## Quiz Instructions

No make up.

One attempt. **No exception.** Its open discussion and notes. Don't hesitate to make new friends ! talk to each other.

connection, connection, connection

### Question 1 10 pts

□The plum pudding model of the atom is

☐

the nucleus at the center and the electrons in orbit around it

☐

electron waves (standing waves) wrapping around the nucleus

☐

a positive dough with embedded little electrons

☐

similar to the Dalton model

### Question 2 15 pts

Luigi Galvani did experiments with frogs. He touch the legs of a frog with two different metals. Maybe iron and copper for example. The legs was the electrolyte. Without realizing it, he built the first ..... later discovered by Volta

☐

Van graaf

☐

capacitor

☐

transistor

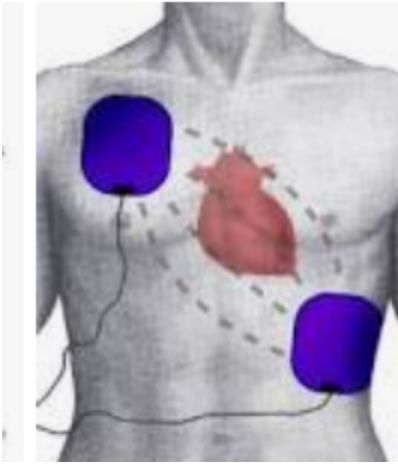

☐

battery

### Question 3 20 pts

A defibrillator is a

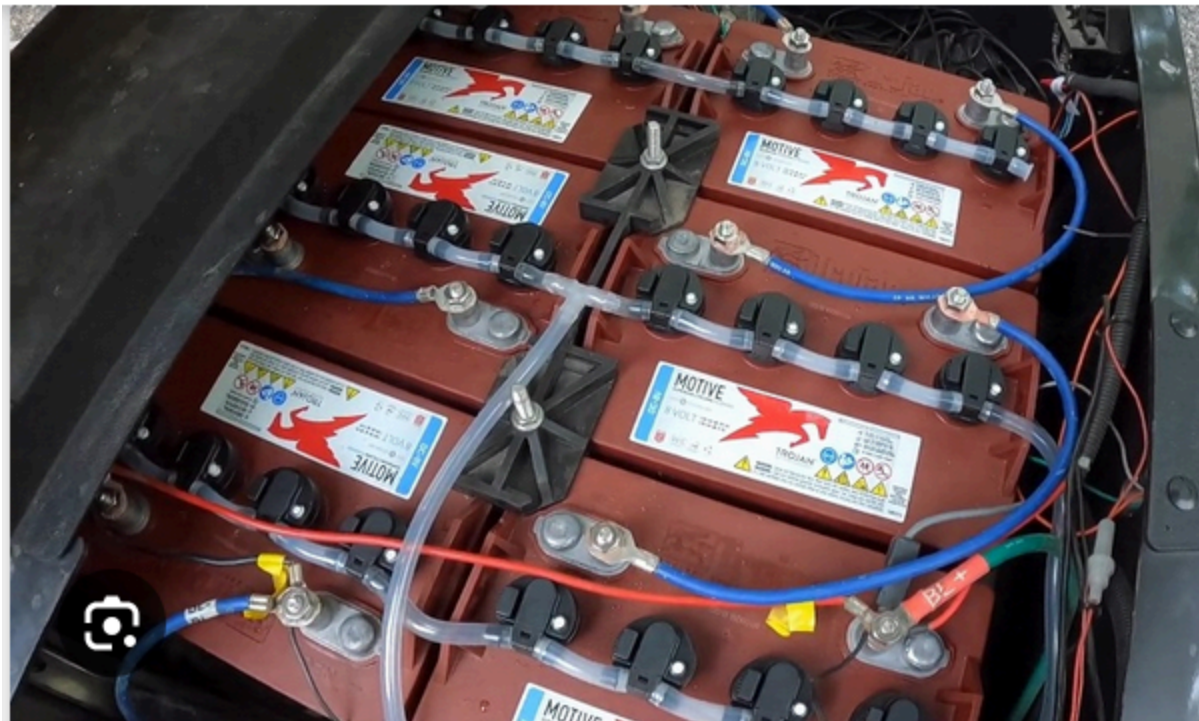

- ☐ capacitor
- ☐ battery
- ☐ transistor
- ☐ electrostatic generaotr

Question 4 15 pts

In a golf cart, 6 V batteries are connected in series. In the picture below how many batteries do you see?  
so what is the total voltage available?

The voltage available is

36V

24V

6V

12V

## Question 5 15 pts

In a metal (conductor) the valence electrons

break free from the lattice spontaneously and jump on you

valence electrons only exist in semi-conductors

are tightly bound to their nuclei

are free to move in a random motion in the lattice

## Question 6 15 pts

Humphry Davis was able to isolate, for the first time, elements like potassium, magnesium ...calcium..

check the slides

bombarding solutions with alpha particles

using electrolysis

using a leyden jar

using a CRT with high voltage

## Question 7 15 pts

Who used Nitrous oxide for this lecture (extra points)

☐

Humphrey Davy

☐

Alessandro Volta

☐

J.J. Thomson

☐

Rutherford
